EXPERIENCE

Frontend Engineering Intern

Dec 2024 - April 2025

HNG TECH

Remote | Nigeria

- Collaborated with cross-functional teams to develop and implement user-friendly web interfaces using HTML, CSS, and JavaScript.
- Participated in designing and developing responsive web applications, ensuring optimal performance across various devices and browsers.
- Adapted to a fast-paced, remote work environment, effectively managing time and tasks to meet project deadlines

Screenplay Writer

May 2024 - Dec 2024

BSK STUDIOS

Remote | London

- Developed strong listening and interpretive skills to understand character motivations, mirroring the ability to empathize with customers and address their concerns effectively.
- Collaborated with directors, editors, and producers to refine scripts, demonstrating teamwork, adaptability, and responsiveness to feedback, which is crucial in customer support environments.
- Researched diverse topics to create authentic stories, showcasing analytical skills and the ability to quickly learn and adapt—key traits in handling customer inquiries across various topics.

E-commerce Store Manager

Feb 2019 - Aug 2021

SHOPIFY

Remote | Lagos

- Customer Relationship Management: Managed end-to-end sales operations, including customer interactions, order fulfillment, and issue resolution, ensuring an exceptional customer experience throughout the lifecycle.
- Brand & Communication Strategy: Developed brand messaging and positioning to ensure clear, customer-friendly communication across all touchpoints, fostering trust and loyalty.
- Problem-Solving & UX Improvement: Leveraged technical expertise in web optimization and conversion rate strategies to enhance user experience, reducing friction and improving customer satisfaction on digital platforms

PROJECTS

Profile Card | Personal Project | Frontend (~8 hours) - [Github](#)

Jan 2025

- Used HTML, CSS, and JavaScript to build a responsive profile card that showcases my details, social links, and a clean UI. This project pushed me to work under a tight deadline while ensuring a sleek, mobile-friendly design. With the Dark mode feature and Parallax effect, deployed with Vercel

Color Guessing Game | Personal Project | Frontend (~6 hours) - [Github](#)

Jan 2025

- Used HTML, CSS, and JavaScript to build a responsive Color Guessing Game for kids with color blindness with retro arcade UI, sound effects, and confetti to make the game interactive and engaging.

ViragoVOX | Collaborative Project (*currently building*)

Sept 2025

- I'm currently working on building a platform like Foundr and Wikipedia that highlights the achievements of women from across the world
